1. Test

```
float add (addend1, addend2){
    Float sum
    sum = addend1, addend2
    return sum
}
```

- name
- parameters
  return data types

Parameters → algorithm / process → return

input(s) → sentences / Function definition → output

4,5 add() 900

addend1	adder2	Exp results	Actual results	Observations
4	5	9,000		
1,2	2,4	3,6000	3,59999	we are missing precision values of 0.00001. Specify the decimals for 2 digits.
0	2	2,000		
-1	-2	-3,000		
12,345	12,345
