PROJECT PROPOSAL Eurotoldo Event Management System

JORGE EDISON LASCANO

October 05, 2026

Requirements

Functional Requirements.

RF - 01: The system shall allow registering, consulting, and updating client information.

RF - 02: The system shall allow registering, consulting, and updating equipment, including name, category, and total quantity available for rental.

RF - 03: The system shall allow registering events, including event type, location, event dates, setup date and time, and expected removal date and time.

RF - 04: The system shall allow registering a quotation with the requested equipment, their quantities, and the agreed value.

RF - 05: The system shall allow creating, consulting, updating, and canceling reservations associated with a client and an event.

RF - 06: The system shall allow assigning equipment and quantities to each reservation, verifying availability.

RF - 07: The system shall allow registering and updating setup and removal schedules, as well marking each activity as completed.

RF - 08: The system shall allow registering payments made for each reservation and calculating the outstanding balance.

RF - 09: The system shall display a summary of each reservation with client data, event details, assigned equipment, setup, removal, total value, registered payments, and outstanding balance.

Non - Functional Requirements.

RNF - 01: The system shall preserve registered information and allow consulting it after closing and reopening the program.

RNF - 02: The system shall restrict access to client and payment information to authorized users.

RNF - 03: The system shall display dates, monetary values, and reservation statuses in a uniform format.

RNF - 04: The system shall use clear labels and messages so that business staff can identify and perform their main operations.
