Explanation of the GitHub Education Issue

One or two semesters ago, I created a GitHub account using my ESPE institutional email address.

For the first homework assignment, I created a new GitHub account using my personal email address. However, when I attempted to link my institutional email, I encountered an issue because it was already associated with my previous account.

To resolve this problem, I removed my institutional email address from the previous GitHub account. After doing so, I successfully linked it to my new account.

For the second homework assignment, I attempted to access GitHub Education benefits. Unfortunately, I was unable to complete the process because I had already accessed these benefits through my previous account using the same institutional email address.

I contacted GitHub Technical Support to explain the situation and find a possible solution. However, despite these efforts, the issue remains unresolved.

As a result, I was unable to obtain GitHub Education benefits through my current account.
