Welcome to the Python installation manager configuration helper.
****
Windows is not configured to allow paths longer than 260 characters.
Python and some other apps can exceed this limit, but it requires changing a
system-wide setting, which may need an administrator to approve, and will
require a reboot. Some packages may fail to install without long path support
enabled.
Update setting now? [y/N]

The global shortcuts directory is not configured.
Configuring this enables commands like python3.14.exe to run from your terminal, but is not needed for the python or py commands (for example, py -V:3.14).
We can add the directory (C:\Users\ASUS\AppData\Local\Python\bin) to PATH now, but you will need to restart your terminal to use it. The entry will be removed if you run py uninstall --purge, or else you can remove it manually when uninstalling Python.
Add commands directory to your PATH now? [y/N] y
PATH has been updated, and will take effect after opening a new terminal.
****
You do not have the latest Python runtime.
Install the current latest version of CPython? If not, you can use 'py install default' later to install.
Install CPython now? [Y/n] y
Python install manager was successfully updated to 26.3.
Additional shebang configuration is now available. Please see https://docs.python.org/using/windows#shebang-lines for more information.
****
The signature for https://www.python.org/ftp/python/index-windows.json was successfully verified.

Preamble
The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.
When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if
