```java
    public void add(Chicken chicken){
        if(currentIndex < chickens.length ){
            chickens[currentIndex] = chicken;
            currentIndex++;
        }else{
            System.out.println("Maxium!!");
        }
    }

    public void remove(int chickenId){
        int index = -1;
        for (int i=0; i< currentIndex; i++){
            if(chickens[i].getId()== chickenId) {
                index= i;
                break;
            }
        }
        if(index== -1){
            System.out.println("No chicken was found with the ID -->" + chickenId);
            return;
        }
        for (int i=index; i<currentIndex -1;i++){
            chickens[i]= chickens[i+1];
        }
        chickens[currentIndex -1] = null;
        currentIndex--;
    }

    public Chicken next(){
        //return new Chicken(3, "Lucy", "white", new Date(2020,3,3), true);
        for(int i=0; i< chickens.length;i++){
            if(chickens[i] != null){
                return chickens[i];
            }
        }
        return null;
    }
```
