Team 11: Code x 5 Team

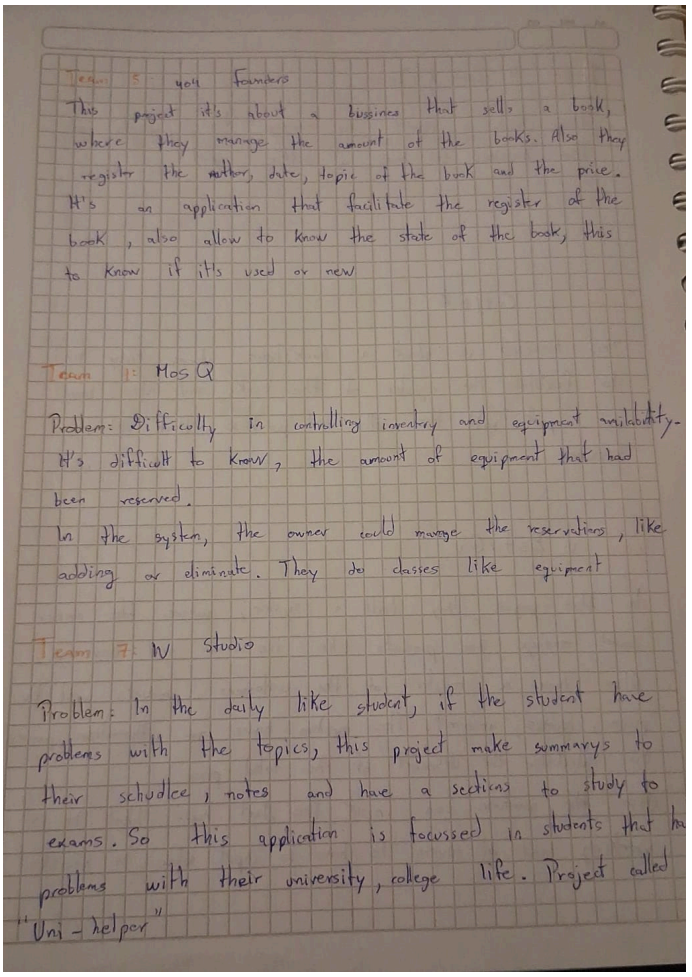

They have a report to manage the products of the bussines to have a better report

Team 2: Ctrl+Z

This bussines is about a bookstore where they find to facilitate the register of the books and also have an report with the sells and purchase that did the bussines

Team 3: EsFuGa

In this project, they built a system, where the owner could manage the products like ice-cream and bevarage. Also have a register of the customers, products with the price, names, amount. The system have an authomatized process to calculate the discount of the total price.
Also the worker can input the start hour, that he is working and of course he have to input when he finished

Team 5: you Founders

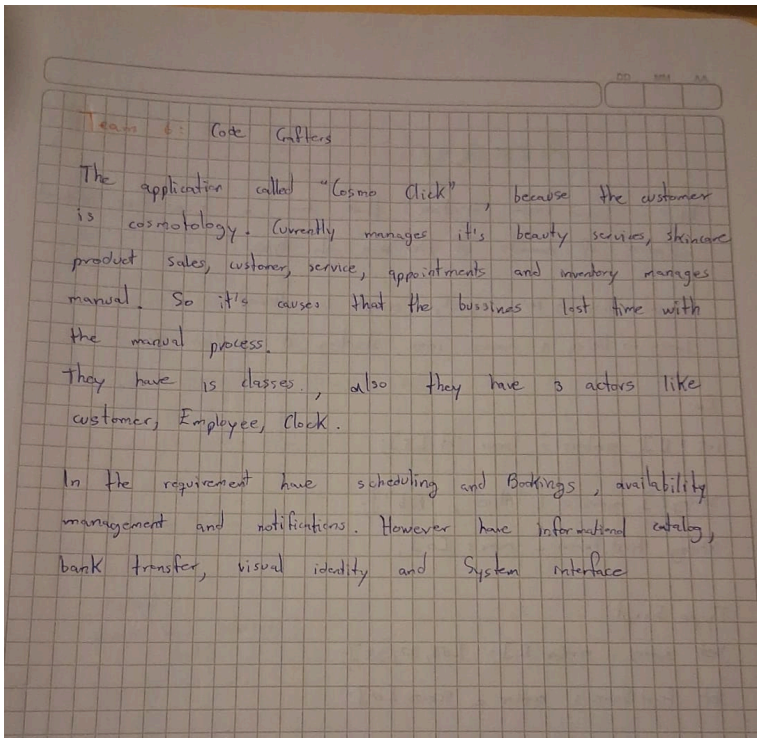

This project it's about a bussines that sells a book, where they manage the amount of the books. Also they register the author, date, topic of the book and the price. It's an application that facilitate the register of the book, also allow to know the state of the book, this to know if it's used or new

Team 1: MasQ

Problem: Difficulty in controlling inventory and equipment availability. It's difficult to know, the amount of equipment that had been reserved.
In the system, the owner could manage the reservations, like adding or eliminate. They do classes like equipment

Team 7: W Studio

Problem: In the daily like student, if the student have problems with the topics, this project make summarys to their schudlee, notes and have a sections to study to exams. So this application is focussed in students that h problems with their university, college life. Project called "Uni-helper"

Team 6: Code Crafters

The application called "Cosmo Click", because the customer is cosmotology. Currently manages it's beauty services, skincare product sales, customer service, appointments and inventory manages manual. So it's causes that the bussines last time with the manual process.
They have 15 classes, also they have 3 actors like customer, Employee, Clock.

In the requirement have scheduling and Bookings, availability management and notifications. However have information catalog, bank transfer, visual identity and System interface
